PROFILE

Frontend Developer who builds clean, fast and responsive websites using React and Bootstrap. Computer Engineering student with 1+ year of hands-on coding experience, 3 completed projects and a strong focus on UI quality and performance. Currently growing into a Full Stack Developer by learning Node.js, Express and databases. Open to work.

PROJECTS

Personal Portfolio Website

React | Bootstrap | JavaScript

- Designed and built a fully responsive developer portfolio with Home, About, Skills, Projects, College, Resume and Contact sections.
- Created reusable React components with a sidebar navigation layout and mobile-friendly design.
- Optimised layout and assets for fast load times across devices.

Product Listing Web App

React | HTML | CSS | JavaScript

- Built a product listing interface with search, category filter, sorting and pagination.
- Managed UI state with React hooks and rendered dynamic lists efficiently.

Responsive Landing Page

HTML5 | CSS3 | Bootstrap

- Developed a pixel-accurate, mobile-first landing page using Bootstrap grid and custom CSS.
- Ensured cross-browser compatibility and clean, semantic markup.

EDUCATION

Bachelor of Engineering - Computer Engineering

Anand, Gujarat

Core subjects: Data Structures, Web Technologies, Database Management, Object-Oriented Programming.

STRENGTHS

Problem Solving | **Quick Learner** | **Clean Code** | **Team Player** | **Attention to Detail** | **UI / UX Sense**
